

Premier of Ontario - Première ministre de l'Ontario

September 9 – 11, 2016

## **A PERSONAL MESSAGE FROM THE PREMIER**

On behalf of the Government of Ontario, I am delighted to welcome everyone participating in the Ontario Sustainable Energy Association's (OSEA) Green Energy Doors Open showcase.

Leaders, thinkers, policymakers, and advocates for the environment will learn about innovative technologies that can help us reduce carbon emissions and live in a sustainable manner. This is also an opportunity to connect and share experiences on how to develop successful green projects.

This showcase of sustainable energy initiatives embodies Ontario's commitment to addressing climate change and creating a sustainable future — with a prosperous economy powered by sustainable energy sources, and thriving communities within a healthy environment.

Ontario is leading the fight against climate change and taking strong action by ending dirty coal, setting aggressive greenhouse gas reduction targets, establishing a cap and trade system, and building transit.

Fighting climate change and protecting the environment is part of our government's plan to build Ontario up and deliver on its number-one priority to grow the economy and create jobs. Our plan is making the largest investment in public infrastructure in Ontario's history and investing in a low-carbon economy driven by innovative, high-growth, export-oriented businesses.

I want to commend OSEA for hosting this important event in our province.

Best wishes for an informative and inspiring showcase.

A handwritten signature in black ink that reads 'Kathleen Wynne'.

**Kathleen Wynne**
