### **ROB McMONAGLE, Bio**

Rob McMonagle has been in the environmental industries sector since the 1980s when he founded one of Canada's first solar companies. Rob was the Executive Director of the Canadian Solar Industries Association from 2002-2006. In 2007 Rob was hired by the City of Toronto to develop the City's Sustainable Energy Plan and was responsible for many of Toronto's renewable energy initiatives such as the Toronto Solar Neighbourhoods Initiative and the Renewable Energy Bylaw. He is currently with the City's Sector Development Office where he is the lead at the City for growing Toronto's diverse green sector

### **Jeff Ranson, Bio**

Regional Director – Greater Toronto Area, Canada Green Building Council

#### **Bio**

As the GTA Regional Director for the CaGBC, Jeff leads green building market transformation in southern Ontario through the CaGBC's Greater Toronto Chapter. Previously, Jeff served as the founding Executive Director of the Toronto 2030 District and Manager of Education for Sustainable Buildings Canada. As lead facilitator for Enbridge's Savings By Design energy conservation program he delivered sustainable design workshops for over 100 major developments across Ontario. Jeff has consulted for numerous private and public sector organizations in Canada and internationally with a focus on capacity building and strategic planning for sustainable development, climate change mitigation and resilience outcomes.

**Julia St. Michael**

**Director, Sustainability Engagement, Enwave Energy Corporation**

Julia joined Enwave in 2017 as the company's first director of sustainability engagement. Through connecting with government and policy makers, commercial real estate professionals, building operators and managers plus industry organizations, Julia represents Enwave within the green building and sustainable energy community, identifying new opportunities for projects and partnerships. Responsible for communicating the sustainability benefits of district energy and supporting the development of low carbon strategies, Julia works with multiple teams to address climate change-related risks within Enwave's operations and new projects.

Previously, Julia was the director of research and sustainability with the Real Property Association of Canada (REALPAC). Julia developed and implemented the association's various research and sustainability initiatives and chaired both the Corporate Responsibility & Sustainability Committee and Research Advisory Committee.

**Gino Di Reeze, P. Eng. Bio**

Gino Di Reeze P. Eng. Is one of the original group of people that started commercializing geothermal heat pump installations and design as far back as 1979. Mr. Di Reeze originally worked for GE developing their HVAC and Heat Pump business lines in Canada. Mr. Di Reeze began Groundheat in 1979 in the Toronto area and across the USA, Asia, Europe Specialties: Groundheat has many Iconic installations for such global clients as: **Ikea, Walmart, Greenpeace**, and among the largest installations of its time. Mr. Di Reeze, P. Eng. was educated at both Ryerson University, the University of Akron, and the University of Toronto.
